THE CROWN · MASTER VI

The Heart-Crag

Zone 5 · Lv 15–20 · 7 areas · 0 new seams

Structure Le Guin · **Climax** Tolkien · **Cause** Hobb · **Cut** Musk razor

#	Area	Lv	What happens
1	**Landing & waypost**	15	arrive; respawn, repair, one vendor
2	**Ring Path**	15	joins the shores; 3 spring checkpoints
3	**Iron Shore** W	15–18	Trial of the Anvil
4	**Gale Cliffs** N	15–18	Trial of the Gale
5	**Tide Grottos** E	15–18	Trial of the Tide
6	**Cliff Stair → Summit**	18–19	all pull the bell → the Ebb
7	**Sea Door → the Heart**	20	True Raid through the sap galleries

The island loop

Land → take any shore → three trials (a bough blooms after each, visible from Oakshire) → the stair opens → ring the bell together → the sea falls on every isle → raids A, B, C on the outer isles → back to the Sea Door → the Heart.

Legend

- Open-air trial
- Ring Path
- Cliff band (wall)
- The one stair
- Spring · checkpoint
- Waypost
- Sap galleries (underground)
- Bared at the Ebb
- Raid seal
- Elder ruin (dressing)

Why it holds together

A warm dome. Its heat feeds the vents, the springs and the tree — nothing else on the Crown needs explaining.

Each shore from its own rock and exposure. West shares Iron-Ness's hot rock; north takes the breach wind; east is where the old kingdom drained the sap to the sea.

The wound. The galleries still bleed sap into the eastern water — the Star-Tide's source. The raid goes in where the harm came out.

The wall and the stair. The cliff band is where the dome's crust cracked; the old kings cut one stair through it.
